The tablericons package (0.1.1) – July 11, 2025

Cédric Pierquet
https://tabler.io/icons (Source version 3.34.0)
https://github.com/cpierquet/latex-packages/tree/main/tablericons (LaTeX package)

cpierquet – at – outlook . fr

This package provides LaTeX support for the tabler Icons project (https://github.com/tabler/tabler-icons).

> *A set of 5944 free MIT-licensed high-quality SVG/PDF icons for you to use in your web projects. Each icon is designed on a 24x24 grid and a 2px stroke.*

To use tablericons in your document, include the package with \usepackage{tablericons}.
An icon can be accessed using the icon name. A list of all included icons with their respective *page* can be found at the end of this document.

1 Example

```
...
\usepackage{tablericons}
...
\begin{document}
...
Inline\tablericon{alarm-snooze}version
...
\end{document}
```

Result: Inline version

2 Usage

2.1 Generic macro

```
\tablericon[filled=TF,height=...,(d)strut=...]<includegraphics options>{name}
```

The boolean [filled] activate filled version of icon (if available). And key [height=...] can be:

- dauto (by default): inline insertion with height/depth;
- auto: inline insertion with height/nodepth;
- a length: normal insertion with fixed height;
- manuel height/depth: normal insertion with fixed height/depth.

The keys [(d)strut=...] can be used to set the *reference* box for dimension calculations.

By default, icons are given with a small border, so the given height is the height of the *full* box, not the hight of the icons.

Example: Inline version or inline version

2.2 Examples

```
%normal version: inline with automatic height/depth (from qX characters)
\tablericon[height=dauto]{alarm-snooze} %or \tablericon{alarm-snooze}
```

q X

```
%normal version: inline with automatic height/depth (from specified characters)
(q\tablericon[height=dauto,dstrut=(qB)]{alarm-snooze}B)
```

(q B)

```
%normal version: inline with automatic height (from X character) default version
\tablericon[height=auto]{alarm-snooze}
```

X X

```
%normal version: inline with manual height/depth
\tablericon[height={0.8em/-0.4em}]{alarm-snooze}
```

qb Xz

```
%fixed height
\tablericon[height=2in]{alarm-snooze}
```

2.3 Used packages

`ifthen`, `calc`, `graphicx`, `xstring` and `simplekv` are loaded and used by the package.

2.4 Bugs

For bug reports and feature requests, report on the GitHub repository `https://github.com/cpierquet/latex-packages/issues`.

3 List of icons

3.1 Outline version (4963 icons)

The PDF file is `tablericons-outline-all.pdf`
