The doodle-icons package (1.0a) – 26/10/2026

Cédric Pierquet
https://khushmeen.com/icons
https://github.com/cpierquet/latex-packages/tree/main/doodle-icons (LaTeX package)

cpierquet – at – outlook . fr

This package provides LaTeX support for the Doodle-Icons project (https://khushmeen.com/icons).

> *A set of 439 free CC0 License high-quality SVG/PDF icons for you to use in your web projects.*

To use doodle-icons in your document, include the package with `\usepackage{doodle-icons}`.
An icon can be accessed using the icon name. A list of all included icons with their respective *page* can be found at the end of this document.

The individual icons are provided as pages of a PDF and are ultimately loaded using the `\includegraphics` command from the `graphicx` package.

Thanks to priiduonu for the tip with stroke color !

1 Example

```
...
\usepackage{doodle-icons}
...
\begin{document}
...
Inline \doodleicon{bottle} version, and colored \textcolor{red}{\doodleicon{bottle}}
...
\end{document}
```

Result: Inline  version, and  colored version

2 Usage

2.1 Generic macro

```
\doodleicon[height=...,(d)strut=...]<includegraphics options>{name}
```

Key `[height=...]` can be:

- `dauto` (by default): inline insertion with height/depth;
- `auto`: inline insertion with height/nodepth;
- `a length`: normal insertion with fixed height;
- `manuel height/depth`: normal insertion with fixed height/depth.

The keys `[(d)strut=...]` can be used to set the *reference* box for dimension calculations.

By default, icons are given with a small border (with fixed 196x196 size), so the given height is the height of the *full* box, not the hight of the icons.

Example: Inline  version or inline  version

2.2 Examples

```
%normal version: inline with automatic height/depth (from qX characters)
\doodleicon[height=dauto]{bottle} %or \doodleicon{bottle}
```

q  X

```
%normal version: inline with automatic height/depth (from specified characters)
(q\doodleicon[height=dauto,dstrut=(qB)]{bottle}B)
```

(q  B)

```
%normal version: inline with automatic height (from X character) default version
\doodleicon[height=auto]{bottle}
```

X  X

```
%normal version: inline with manual height/depth
\doodleicon[height={0.8em/-0.4em}]{bottle}
```

qb  Xz

```
%fixed height
\doodleicon[height=2in]{bottle}
```

2.3 Used packages

graphicx is loaded and used by the package (the key handling relies on expl3, which is part of the LaTeX kernel since October 2020).

2.4 Bugs

For bug reports and feature requests, report on the GitHub repository https://github.com/cpierquet/latex-packages/issues.

3 List of icons

The PDF file is `doodle-icons-all`.
Icons are colored in violet.

Icon	Name	Direct command	PDF page
