The skill-icons package (0.1a) – 29/10/2026

Cédric Pierquet
https://github.com/LelouchFR/skill-icons
https://github.com/cpierquet/latex-packages/tree/main/skill-icons (LaTeX package)

cpierquet – at – outlook . fr

This package provides LaTeX support for the Skill Icons project (https://github.com/LelouchFR/skill-icons), a set of icons of programming languages, tools, frameworks and software, with a *dark* and a *light* version.

> *A set of 837 icons (logos of languages, tools, frameworks...), each one with a dark and a light version.*

To use skill-icons in your document, include the package with `\usepackage{skill-icons}`.

An icon can be accessed using the icon name. A list of all included icons with their respective *page* can be found at the end of this document.

The individual icons are provided as pages of two PDF files (one for each theme) and are ultimately loaded using the `\includegraphics` command from the `graphicx` package.

The icons are **colored** (logos with their own background): the current color of the text has no effect on them.

1 Example

```
...
\usepackage{skill-icons}
...
\begin{document}
...
Inline \skillicons{python} version, and light \skillicons[theme=light]{python} version
...
\end{document}
```

Result: Inline version, and light version

2 Usage

2.1 Generic macro

```
\skillicons[height=...,(d)strut=...,theme=...]<includegraphics options>{name}
```

Key `[height=...]` can be:

- `dauto` (by default): inline insertion with height/depth;
- `auto`: inline insertion with height/nodepth;
- `a length`: normal insertion with fixed height;
- `manual height/depth`: normal insertion with fixed height/depth.

The keys `[(d)strut=...]` can be used to set the *reference* box for dimension calculations.

The key `[theme=...]` can be `dark` (by default) or `light`, see the next subsection.

The given height is the height of the *full* box of the icon (the icon may include a small border).

Example: Inlineversion or inline version

2.2 Dark and light themes

Each icon exists in two versions, stored in two PDF files with the same page numbers: `skill-icons-dark-all` and `skill-icons-light-all`.

- the **dark** theme (by default): icons with a *dark* background (or designed for it);
- the **light** theme: the same icons, with a *light* background (or designed for it);
- some icons are *neutral*: the original project provides only one version, which is then the same in both PDF files.

The theme can be chosen:

- for an icon, with the key `[theme=dark]` or `[theme=light]`;
- for the whole document, with the package option, `\usepackage[light]{skill-icons}`, or at any time with `\skilliconssetup{theme=light}` (the setting is global, and can be changed by another call).

```
\skillicons[theme=dark]{github} \skillicons[theme=light]{github}
\skilliconssetup{theme=light}
\skillicons{github} \skillicons[theme=dark]{github}
```

2.3 Examples

```
%normal version: inline with automatic height/depth (from qX characters)
\skillicons[height=dauto]{python} %or \skillicons{python}
```

q  X

```
%normal version: inline with automatic height/depth (from specified characters)
(q\skillicons[height=dauto,dstrut=(qB)]{python}B)
```

(q  B)

```
%normal version: inline with automatic height (from X character)
\skillicons[height=auto]{python}
```

X  X

```
%normal version: inline with manual height/depth
\skillicons[height={0.8em/-0.4em}]{python}
```

qb  Xz

```
%fixed height
\skillicons[height=2in]{python}
```

2.4 Used packages

graphicx is loaded and used by the package (the key handling relies on expl3, which is part of the LaTeX kernel since October 2020).

2.5 License and attribution

The package is released under the LaTeX Project Public License v1.3c or later.

The icons come from the Skill Icons project, released under the MIT license: the original project is tandpfun/skill-icons (https://github.com/tandpfun/skill-icons, © 2022 tandpfun), and the icon set used here (with the dark and light versions) is the one of LelouchFR/skill-icons (https://github.com/LelouchFR/skill-icons, © 2024 Baptiste Zahnow). The MIT license requires to keep the copyright notice and the permission notice in all copies of the icons.

The icons are the logos of programming languages, tools, companies and software, which remain the **property of their respective owners**; they are provided to identify these products and their use may be subject to the guidelines of their owners.

2.6 Naming

The icon names are those of the original project, in lowercase and without separators (`python`, `githubactions`, `vscode`, `reactnative`...). A package named skillicons also exists on CTAN: skill-icons is a distinct package, and all its files are prefixed by `skill-icons`.

2.7 Bugs

For bug reports and feature requests, report on the GitHub repository `https://github.com/cpierquet/latex-packages/issues`.

3 List of icons

The PDF files are `skill-icons-dark-all` and `skill-icons-light-all` (same page numbers).
